PROMOTING GREEN LIVING AREAS

Project title: Dialogue 4 Living areas

Project Type: Institutional Dialogue Project, Priority: MED Governance, Specific Objective: 3.1: Other actions to support a better cooperation under the 3rd Call for Governance Projects

Programme: Interreg Euro-Med Programme

The **Green Living Areas Mission** aims to improve the lives of Mediterranean citizens by promoting the development of green living areas!

The Mission is jointly managed by two key projects working on two different aspects: **Dialogue 4 Living Areas** aims to amplify the transfer of policies by **fostering focused dialogue among policy makers and their stakeholders**, focusing on policy improvement and transformation. The project brings to life the concept of 'green living areas' in the Mediterranean through a holistic approach that includes:

- ⇒ Promotion of energy efficiency;
- ⇒ Renewable and citizen energy communities;
- ⇒ Support of sustainable urban transport;
- ⇒ Improvement of waste and water management.

A project labelled by the UfM

Union for the Mediterranean
Union pour la Méditerranée
الاتحاد من أجل المتوسط

Together with the Community4LivingAreas - a parallel Thematic Community project -, Dialogue4LivingAreas will undertake projects that bring local communities to life with **green development at their epicenter**, reducing negative climate impacts on the region's ecosystems, and enhancing climate resilience. It will do so by fostering focused dialogue among policy-makers and their stakeholders through an innovative support mechanism to actively participate in a **Euro-med working Community for green Living areas' Institutional Dialogue**. Throughout the course of **7 years**, the project's activities will capitalise on each other to gradually increase the number of actors involved and broaden the scope of the actions!
